PROFILE SUMMARY

- A highly skilled **DevOps Cloud Engineer** with **9 years of industry experience**, including **6 years as a Senior System Administrator** and **3 years specializing in DevOps practices**.
- Expertise in **cloud infrastructure, automation, and application security**, with a proven track record of designing and deploying scalable **multi-cloud environments**.
- Proficient in automating deployment pipelines, optimizing **CI/CD** processes, and ensuring robust **security** through **white-box, black-box, and grey-box** testing.
- Experienced in leading cross-functional teams and acting as the **Single Point of Contact (SPOC)** for **security incidents**.
- Adept at implementing **cloud architectures** with a focus on **high availability, auto-scaling, and resource management** using **Docker, Kubernetes, and Terraform**.
- Extensive experience in managing cloud environments with expertise in **AWS, NGINX, HAProxy, and load balancing** technologies.
- Proven ability to enhance system **reliability, scalability, and performance**, leveraging tools like **Nagios, SonarQube, and Redis** for monitoring and performance tuning.
- Strong background in **penetration testing** and **security audits** with tools such as **Burp Suite, Nmap, and Nessus**, ensuring adherence to industry standards like **ISO 27001**.
- Expertise in managing large-scale infrastructure, including database optimization and migration, with a focus on delivering **cost-effective, secure, and highly available** solutions.
- Committed to continuous improvement and passionate about mentoring teams to foster a collaborative and growth-oriented work culture.

CORE COMPETENCIES

- | | | |
|---|--|--|
| Cloud Infrastructure Design & Deployment | Multi-Cloud Architecture | Load Balancing & High Availability Solutions |
| CI/CD Pipeline Automation | Performance Optimization & Resource Management | Database Optimization & Management |
| Containerization & Orchestration | Penetration Testing & Security Audits | Configuration Management & Automation |
| Cloud Security & Vulnerability Management | System Administration | Team Leadership & Cross-Functional Collaboration |

NOTABLE ACCOMPLISHMENT ACROSS CAREER

- Implemented **access control** in PostgreSQL integrated with Active Directory, enhancing security and achieving **high availability** through clustering.
- Led the **implementation of endpoint security** across the organization using Securite, providing advanced antivirus and security features.
- Successfully **migrated 300+ employee email mailboxes** from Yahoo/Abacco to an on-premises, open-source **HMail Exchange server**, ensuring seamless communication and improved performance.
- Migrated **200+ instances** from physical servers to a **virtualized environment** using **Proxmox**, while implementing clustering and a **SAN storage solution** for improved scalability and reliability.
- Extensive experience in **IIS web farming** to maintain **high availability** and optimize web server performance.
- Designed and implemented a fully functional **SMTP server**, improving email communication infrastructure.
- Awarded **"ACE Performance of the Year 2025"** by IdeaInfinity for exceptional contributions to system management and security.
- Recognized as **"Brainiac Idean"** in 2021 for innovation and technical excellence.
- Managed and mentored teams in the roles of **System Administrator, Database Administrator, Network Administrator, DevOps Engineer, and Server Administrator**, ensuring effective collaboration and performance.
- Implemented **Nagios Core** for enterprise-level **resource monitoring** and performance tuning across **200+ instances**, enhancing system reliability and efficiency.
- Led a developer team to successfully implement an **AI-based OCR module** in a mobile application, utilizing new technologies that were highly recognized by IdeaInfinity.

WORK EXPERIENCE

Since August 2016 | Idea Infinity IT Solution Pvt. Ltd.

Growth Path:

Senior System Administrator
August 2016 - January 2021

DevOps Cloud Engineer
Since February 2021

DevOps Cloud Engineer

Roles:

- Designing and deploying **scalable cloud architectures** to enhance operational efficiency across multi-cloud environments, focusing on cost optimization and performance.
- Automating deployment pipelines & optimizing **CI/CD processes** using **Jenkins, GitLab, & Terraform**, ensuring rapid & reliable software delivery.
- Managing & maintaining containerized environments through **Docker & Kubernetes**, ensuring seamless **auto-scaling** and high availability.
- Leading deployment and management of **cloud infrastructure** on **AWS**, with a strong emphasis on security, cost management, and uptime.
- Implementing advanced **load balancing** solutions using **NGINX & HAProxy** to optimize application performance & ensure high availability.
- Spearheading **security initiatives** & acting as **client security liaison** by conducting thorough **penetration testing & vulnerability assessments**.
- Collaborating with cross-functional teams to ensure **system reliability & scalability** by leveraging tools such as **Nagios** for proactive monitoring.
- Driving **application security** measures by conducting extensive **white-box** and **black-box** testing, ensuring compliance with global security standards.
- Leading a team of **IT professionals**, mentoring and providing guidance to foster growth and skill development within the team.
- Continuously evaluating and enhancing **database performance**, including implementing clustering techniques for improved performance and availability.

Senior System Administrator

Roles:

- Administered & maintained **Linux & Windows servers** to ensure continuous system availability and performance across multiple platforms.
- Implemented **firewall solutions** & security protocols using **SonicWall & FortiGate** to safeguard systems and ensure regulatory compliance.
- Optimized **virtualized environments** on platforms such as **Proxmox, ESXi, and vCenter**, enhancing overall resource utilization and reducing hardware costs.
- Conducted **security audits** and **penetration testing** on company infrastructure, identifying vulnerabilities and implementing corrective actions to ensure system security.
- Managed & configured **Nagios Core** for proactive monitoring & ensured that **SLAs** for system uptime & performance were consistently met.
- Deployed, maintained, & monitored **open-source tools** such as **SonarQube** for code quality management & **hMailServer** for email services.
- Provided tier 2 and tier 3 **technical support** and troubleshooting for both internal and client-facing systems, ensuring minimal disruption and rapid issue resolution.

November 2015 - July 2016 | Tata Teleservice, Bangalore | Junior Network Engineer

- Configured and troubleshooted **DSL modems** and **routers**, providing reliable internet solutions to customers.
- Managed **DSLAM servers**, ensuring optimal broadband services for residential and business customers.
- Provided high-quality **customer support**, addressing technical issues and troubleshooting network problems to meet **SLA** standards.
- Conducted regular network maintenance and ensured timely software upgrades and patches to prevent service disruptions.

EDUCATION | CERTIFICATION

- **Bachelor of Engineering (B.E.) in Electronics & Communication** | *Sri Ramakrishna Engineering College, Coimbatore*
Graduated with distinction, achieving a GPA of 7.5 | 2015

Certifications:

- **CCNA (Cisco Certified Network Associate)**
- **DevOps Training: Tools and Automation Practices**
- **Cybersecurity: Fundamentals and Advanced Techniques**
- **Penetration Testing: Vulnerability Assessment and Exploitation Techniques**

TECHNICAL SKILLS

- **Monitoring Tools:** Nagios Core | New Relic | Resource Monitoring
- **Firewall:** Sonicwall | PF Sense | Fortigate
- **DevOps Tools:** Jenkins | GitLab | Docker | Kubernetes | SonarQube | Bugzilla | Kafka | GIT
- **Servers:** Windows | SUSE Linux | Ubuntu
- **Web Hosting:** IIS | NGINX | Apache | .NET | Microservices
- **Exchange:** HMail | O365 | Roundcube
- **Scripting Languages:** Bash | PowerShell | Python
- **Load Balancer:** NGINX | HAProxy
- **Virtualization:** Proxmox | ESXi | Clustering
- **Endpoint Security:** Securite
- **Databases:** Oracle | PostgreSQL | MSSQL
- **Business Intelligence (BI) Tools:** Power BI | Tableau

PERSONAL DETAILS

- Languages : English, Tamil, and Kannada
- Date of Birth : 26th June, 1993
- Location : Bangalore - Karnataka
